FISHING PLAN

WACONICHI LAKE CABIN SECTOR

WACONICHI LAKE (LAKE TROUT)

In order to preserve the quality of fishing for future generations, the possession limit for lake trout is **2 at all times**.

The possession limit for **pike is 8**.

The possession limit for **brook trout is 15 or 5 kg + 1 trophy**, whichever limit is reached first.

Walleye, which are not very abundant on Lake Waconichi, are subject to a bag **limit of 8**.

WALLEYE LAKES

For walleye fishing, some lakes are accessible with a daily random draw (at 7 p.m. every night).

Lac Lemieux: The regulatory measure concerning minimum 32-cm size must be applied. Any walleye less than 32 cm long will have to be released into the water.

*Note that lakes accessible via Route 167 North may not be fished on the first walleye fishing trip, and **will therefore be used to complete your quotas** (max 4 walleyes per person and 1 access per stay).

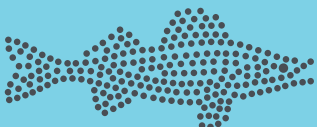

The same possession limits per person for each species apply on the other lakes in the fishing plan. However, to protect the resource, walleye possession limits may vary depending on the lake (see p.2).

DID YOU KNOW?

As set out in the James Bay and Northern Quebec Agreement (JBNQA, Chapter VIII-34), some species of fish are reserved for the exclusive use of Aboriginals. These include burbot and whitefish, both of which are found in Lake Waconichi. If they are caught accidentally, they must be returned to the water, as it is forbidden to fish for them anywhere in the region.

Visitors can come across Cree fishermen practicing their traditional activities (JBNQA) at the water points.

We ask you to be courteous and vigilant, nets may still be in use in the spring. In addition, it is prohibited to use native camps throughout the territory.
